

GETTING TO KNOW YOU...INFORMATION ON CARE RECEIVERS II

Last Name: _____ First Name: _____ Middle Initial: _____

Basic information on our care receivers can be helpful to professional caregivers as they get to know the care receiver. Personal information can help caregivers personalize care and interactions. Information on the care receiver's likes and dislikes can guide the caregiver(s) to provide care with a focus on individual quality of care. Our family member may like to be called by a certain name or nickname. They may no longer recognize that they are "Mom" or "Dad". Following is some information that you may want to share with caregivers to help them become acquainted with your loved one. The information can be kept in a booklet in the resident's room for caregivers' quick reference. Add any information to familiarize your caregivers with the care receiver.
